

I have already e-mailed the FCC commissioners regarding my feelings on this issue. XM Radio keeps me up to date on important news issues that have not been filtered by local radio personality. In addition I do not have to keep listening to the same top ten bubblegum songs on a daily basis. This is a product I pay for, it is my right as a consumer to continue to receive this product, which I think is an excellent product locally in my somewhat rural area or when travelling.
